INÈS MANAI

Management Information Systems · Business Intelligence & Data Analytics

ynes.manai@gmail.com | Ben Arous, Tunisia | github.com/ynesmanai

PROFILE

Third-year Bachelor's student in Management Information Systems (E-Business specialization) at ESSECT, with a profile at the intersection of IT and business. Hands-on experience in Business Intelligence and Data Analytics gained through two internships: data preparation (Python, SQL), predictive modelling and Power BI dashboards. Seeking a final-year internship (PFE) and a Master's programme in Data Analytics / Business Analytics, ideally in the gaming industry.

EDUCATION

Bachelor's in Management Information Systems, E-Business specialization — Since 2024 · 3rd year (2026-2027)
École Supérieure des Sciences Économiques et Commerciales de Tunis (ESSECT)

PROFESSIONAL EXPERIENCE

BI & Data Analytics Intern — June – July 2026
Université Libre de Tunis (ULT)

- Built a predictive model of student dropout risk (logistic regression, AUC-ROC of 0.823) and a multipage Power BI dashboard covering global and individual predictions.
- Automated data merging and cleaning in Python and strengthened the analysis: fixed a data leakage issue, handled ambiguous values, set percentile-based risk thresholds.
- Conducted a comparative study of 15+ BI tools for a company using SAGE, with hands-on testing of the two finalists (Power BI, Metabase); contributed to a multi-phase deployment roadmap.

E-commerce Assistant, Shopify content — Since August 2025
Lecoindesjeux.com

- Published and optimised product pages (SEO, keywords, collections) to improve visibility and user experience.

Data Analysis & Visualization Intern — July 2025
Vermeg

- Processed large log files with Python and structured the data in MySQL for exploration.
- Designed Power BI dashboards highlighting trends useful for decision-making.

PROJECTS

Steam & Resident Evil: A Data-Driven Exploration (Power BI) — Personal project

- Designed a 3-page Power BI report: Steam market (71,000+ games, 2000–2025 releases, genres, platforms, prices, Metacritic score) and analysis of 14,473 player reviews of the Resident Evil franchise (78.5% positive).
- Cleaned and modelled the data; created dedicated indicators (average price excluding free games, share of free games, satisfaction rate per title) and a sentiment analysis.

SKILLS

Data & BI: Power BI · Python · SQL (MySQL) · data cleaning and preparation · exploratory analysis · reporting and visualization · predictive modelling (logistic regression, AUC-ROC)

Business & digital: Business problem analysis · decision support · Shopify and product SEO · Office 365

Development: HTML / CSS / JavaScript · Java (university projects)

Generative AI: Use of AI tools as work assistants (code, analysis, writing), with review and validation of results · prompt engineering (IBM certification)

Soft skills: Analysis and synthesis · problem solving · communication · autonomy · teamwork

CERTIFICATIONS

IBM · "Python for Data Science, AI & Development" — Coursera, Dec 2025
IBM · "Generative AI: Prompt Engineering Basics" — Coursera, June 2026

LANGUAGES

Arabic: fluent · French: fluent · English: C1 · Spanish: A2 · Chinese (Mandarin): HSK 1

INVOLVEMENT

Member of InfoLab club, ESSECT (since 2026) · Former member of Hyphestacy club, ISI Kef (2024–2025) · Volunteer, École des Aveugles de Bir El Kassa (2023)
